

Discover the NYCAST® Advantage

NYCAST® 6PA XHA blue

CAST NYLONS LIMITED offers a heat stabilized cast nylon 6. The heat stabilizer retards the loss of physical properties as temperature increases. This allows the material to function at approximately 10% higher temperatures than standard grades; meaning NYCAST XHA operating at 200°F (93°C) will have approximately the same physical properties as a standard material at 185°F (85°C). This material has delivered successful performance throughout the years.

The main advantages of NYCAST XHA blue are:

- Can work at higher operating temperatures
- Retains physical properties under higher temperatures
- Light weight
- Excellent abrasion and wear resistance
- Easy to machine

Also available in natural, black and forest green
